

Kester Beads K-72 Exfoliant

Kester Wax 72 Beads are composed of plant derived behenyl alcohol and plant derived behenic acid. They are esterified producing the ester, behenyl behenate. This naturally derived ester has been granulated to a precise 40-60 mesh particle size. The Beaded K-72 gently exfoliates without causing irritation of the skin.

Applications:

Exfoliating Cleansers, Body Scrubs, Facial Scrubs, Shower Gels

Advantages:

Kester Wax K-72 is highly compatible, versatile, time proven, and gentle. Kester Wax K-72 provides a direct, cost effective replacement for other exfoliants.

Regulatory Information:

INCI NAME: Behenyl Behenate

CAS #: 17671-27-1

Wax#	Wax Name	Melting Point	Acid Value	Saponification Value	Color
131	Kester Beads K-72 Exfoliant	70 - 74°C	<2	79 - 89	White to Light Yellow
