

Kester Wax K-24

Kester Wax K-24 is a plant based low molecular weight very pure monoester that is compatible with most other cosmetic ingredients. Kester Wax K-24 has application as a slip agent and a skin penetrating agent for anhydrous systems like mineral oil. Kester Wax K-24 can replace many ester oils in cosmetic formulas and provide a smooth non-greasy feel. The low melt point of Kester Wax K-24 helps to increase the stability of cosmetic formulations.

Applications:

Lipsticks, Lip Balms, Eye Shadow, Pencils, Sun Tan Gels, Hot Pour Make-ups, Hair Care, Antiperspirants, and **Household Products**.

Advantages:

Kester Wax K-24 allows a formulator greater opportunity to use various oils and fluids in products without producing the occlusive skin feel that is typical with some oils. The consistency and texture of the K-24 allows the formulator to easily regulate the feel and emollience of oils and fluids in cosmetic formulations.

Regulatory:

INCI Name: Lauryl Laurate CAS#: 13945-76-1

Wax#	Wax Name	Melting Point	Acid Value	Saponification Value	Ester Value	Color
358	Kester Wax K-24	23 - 30°C	<2	130 - 150	130 - 150	Off White to Yellow
352	Kester Wax K-385	40 - 50°C	<5	105 - 130	–	White to Light Tan
120, 177	Kester Wax K-48, Cetyl Esters	43 - 53°C	<5	109 - 125	–	White
254	Kester Wax K-56	54 - 57°C	<2	100 - 105	–	White
129	Kester Wax K-59	57 - 61°C	<2	97 - 104	–	White to Off White
