

Beeswax has been known since antiquity to have moisturizing, emulsifying, and antiseptic qualities. No wonder it's one of the most popular ingredients in high-end cosmetics. And now, with our 100% Organic and regular Organic Beeswax, you are guaranteed the purest and highest quality beeswax offered anywhere.

Because of the highly complex composition of beeswax and its soft pliable nature, beeswax remains an indispensable raw material for many finished products even after centuries of commercial use.

Organic Beeswax is sourced from regions in Africa, free of modern agricultural techniques and chemical treatment with fertilizers and pesticides. Certification has been issued by a USDA Foreign Accredited Certifying Agent. Quality is strictly controlled in our modern production facilities as well as in our well-equipped laboratory.

Applications:

Creams, Lotions, Cold Creams, Sunscreens, Depilatories, Ointments, Salves, Sustained Release in Pharmaceuticals, Food Additive, **Food Inks and Coatings**, **Non-food Inks and Coatings**, Soft Gels, Candles, and Emulsions other than Cosmetics.

Advantages:

Free of herbicides and pesticides. The natural beeswax chemistry remains intact.

Regulatory Information:

INCI Name: Yellow Beeswax CAS#: 8012-89-3

SPECIFICATIONS:							
Wax#	Wax Name	Melting Point	Acid Value	Ester Value	Ratio	Cloud Point	Iodine Value
