

INTRODUCTION

Lanolin wax is the semisolid fraction from whole lanolin. It is used as a hair or skin-conditioning agent, viscosity modifier and binder.

Most personal care products with lanolin wax fall into the "Hair Styling" category. We have found the systems are thick emulsions with a high percentage of lanolin wax. These products are typically categorized as stylers, waxes, putties, or fibers.

Koster Keunen has determined that Kester Wax CT:

- Can replace up to 10% lanolin wax in firm emulsion hair stylers.
- Can act as a direct replacement depending on the type of lanolin wax and the amount to be replaced.

Kester Wax CT is a vegan, soft-solid wax. In addition to being a replacement for lanolin wax, it offers emolliency, thickening and moisturization to both skin and hair formulations.

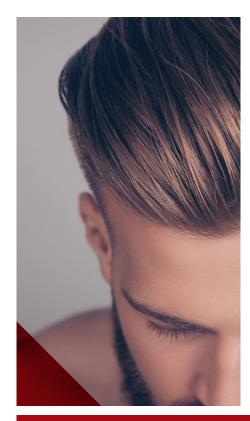

INCI: C32-26 Isoalkyl Stearate, Polyhydroxystearic Acid, Stearyl Behenate, Cetearyl Alcohol, Polyglyceryl-3 Stearate, Polysorbate 60.

STYLING WAX

Ingredient	%
Phase A	
Aqua	57.65
Disodium EDTA	0.05
Acrylates/C10-30 Alkyl Acrylate Crosspolymer	0.10
Triethanolamine	0.20
PVP	5.00
Propylene Glycol	5.00
Pentylene Glycol, Propanediol, Caprylyl Glycol, Ethylhexylglycerin	1.00

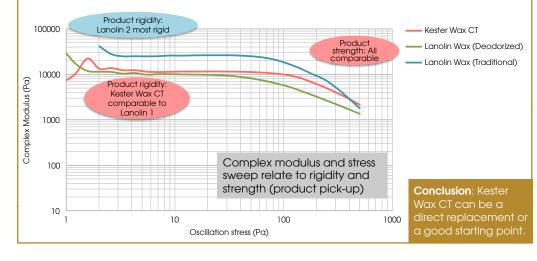

Phase B	
Kester Wax CT or Lanolin Wax*	10.00
Kester Wax K-60P	10.00
Kester Wax K-24	5.00
Permulgin D	6.00

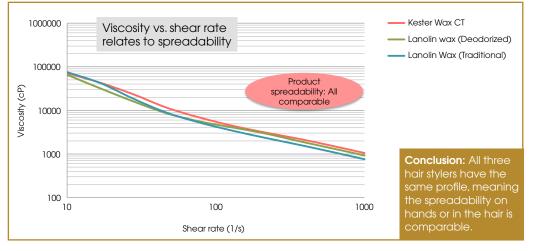

Rheology Studies

The styling wax formulas were subjected to rheology measurements and profiling using a Thermo Scientific HAAKE™ MARS™ Rheometer.

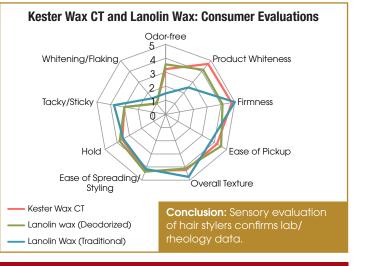

Sensory Panel

Ten participants were selected for panel testing. Panelists were given the three styling waxes listed above and provided detailed directions regarding proper application and evaluation procedures.
